U. KEERTHIVASAN

Python Developer | AI & Data Science | Full Stack Developer

Cuddalore, TN | keerthivasan5006@gmail.com | +91 6374603767 | github.com/keerthivasan369 | linkedin.com/in/keerthivasan-u-9b53022a6

PROFESSIONAL SUMMARY

Motivated B.Tech AI & DS (Hons) student (3rd Year, CGPA: 8.66) with hands-on experience in Python, Flask web development, and machine learning fundamentals. Completed a Full Stack Development Internship with practical front-end and back-end exposure. Seeking a Python Developer or AI & Data Science Internship to build impactful real-world solutions.

EDUCATION

B.Tech — Artificial Intelligence & Data Science (Hons) 2023 – 2027 | CGPA: 8.66

3rd Year, 6th Semester | Cuddalore, Tamil Nadu

- Key Subjects: Data Structures, OOP, Machine Learning, DBMS, Operating Systems, Web Technologies.

12th — Senthil Matric Hr. Sec. School, Cuddalore 2022 – 2023 | 86%

10th — Senthil Matric Hr. Sec. School, Cuddalore 2020 – 2021

TECHNICAL SKILLS

Languages: Python (Primary), JavaScript (Basics)
Web: HTML5 (90%), CSS3 (85%), JavaScript (60%), Flask (80%), Django (50%)
ML & AI: Machine Learning Basics, Object Detection, Scikit-learn, NumPy, Pandas
Tools: Git, GitHub, VS Code, Figma, Jenkins, Replit, MS Office
Concepts: Data Structures, OOP, Algorithms, SDLC

INTERNSHIP EXPERIENCE

Full Stack Development Intern — THE MAIND IT, Trichy 2026 | 15 Days

- Developed responsive front-end interfaces using HTML5, CSS3, and JavaScript; built server-side logic with Python.
- Implemented Git-based version control and collaborated in a professional development workflow to deliver web applications on schedule.

PROJECTS

Object Prediction System 2025

Python | Machine Learning | Scikit-learn | NumPy | Pandas

- Built an ML-based object prediction system using classification algorithms; applied feature engineering and hyperparameter tuning to optimize model accuracy and reliability.

AI-Based Interactive Kiosk System 2025

Python | Artificial Intelligence | NLP | Voice/Text Interface

- Developed an AI-powered kiosk that handles voice and text queries using NLP logic, delivering an accessible and intuitive user experience.

Personal Portfolio Website 2026

Python | Flask | HTML5 | CSS3 | JavaScript | Jinja2

- Engineered a fully responsive Flask portfolio with Admin Panel (secure login, visitor analytics, live content editing) and dark-theme modern UI — zero code changes needed to update content.

INTERESTS

Chess (strategic thinking & analytical reasoning) **Music** (creativity & focus) **Self-Learning** (Python, AI/ML, open-source exploration)
